

GPC Neptune's Harvest Adventure Tour

March 2nd and 3rd -10:00AM to 12:00 Noon

Neptune's Harvest is a **division of Ocean Crest Seafoods Inc.**, established in 1965 as a wholesale fish and seafood company. Their fertilizer is made with fresh caught North Atlantic fish right on the docks of Gloucester, MA.

The GPC and Neptune's Harvest have partnered together for two exclusive tours of the Neptune's Harvest Processing Plant and Facilities hosted by Ms. Ann Malloy. Experience the behind the scenes' processes and smells of some of the best emulsions, fertilizers and amendments made for successful gardening and growing gigantic fruits and vegetables. See in person how it is done.

Once the tour has completed, we will drive over to the harbor and stop at a fantastic seafood restaurant for lunch where you will be *on own your own* to order whatever seafood delight you may desire. View the harbor where the Wicked Tuna boats are tied up for the winter.

There is no charge for this exclusive tour, and you will want to book your flights early to take advantage of this great opportunity. Two tours are scheduled, one Thursday AM, and one Friday AM.
